

## Dräger X-plore® Bayonet Filter

Experience a new dimension of comfort and safety in respiratory protection: the Dräger X-plore® Twinfilter series. Utilization of modern materials coupled with an attractive design ensures maximum comfort and user acceptance.

## Benefits

---

### Innovative and comfortable

The extensive X-plore Bayonet filter series is an innovative line of twin filter respiratory protection products for all major applications which combines modern design with enhanced wearer comfort. The off-center arrangement of the bayonet connections enables a wide and unobstructed field of view. The filters are suitable for use with Dräger X-plore 3300/3500 half masks and Dräger X-plore 5500 full face masks with Dräger bayonet connection.

---

### Easy and secure attachment

The filters are equipped with a secure and quick-release bayonet catch which provides easy guidance until they click into place. The P3 particle filters have a white housing for easy identification.

---

### Many possibilities

The gas cartridges can be upgraded to operate as combination cartridges by using various pad attachments or Dräger X-plore® Pure with an adapter. The additional particle filters can be replaced independently from the gas cartridge. An optional coarse particulate prefilter prevents premature clogging of to the combination cartridge with grit or spray paint.

---

### Extremely economical

The filters are packaged in pairs so that only the required number of filters have to be opened. In addition, the filters offer a long shelf life (from date of production) which is six years for gas and combination filters, twelve years for particle filters, three years for pads and four years for Pure filters.

---

### Durable plastic housing

All bayonet filters are equipped with a robust plastic housing.

---

### CE marking

All filters are CE-marked in accordance with EN 14387 and/or EN 143.

---

### Supporting cartridge selection

The Dräger VOICE database of hazardous substances offers comprehensive support for selecting cartridges ([www.draeger.com/voice](http://www.draeger.com/voice)).

## Technical Data

### FILTER COLOUR CODING

Colour	Filter Type	Main field of application
brown	A	Organic gases and vapours (boiling point > 65 °C)
grey	B	Inorganic gases and vapours
yellow	E	Sulphur dioxide, hydrogen chloride
green	K	Ammonia
red	Hg	Mercury vapour
white	P	Particles
